The Mayo Clinic Coagulation Laboratories have been performing coagulation factor testing on mailed-in specimens for

Guidelines for Specimen Handling and Processing

INTRODUCTION. Antiphospholipid syndrome (APS) is characterized by venous or arterial thrombosis and/or an adverse pregnancy outcome in the presence of persistent laboratory evidence of antiphospholipid antibodies (aPL). APS occurs either as a primary condition or in the setting of an underlying disease, usually systemic lupus erythematosus (SLE).

Diagnosis of antiphospholipid syndrome - UpToDate

The amplification was done using GTQ-CYCLER 96 thermocycler machine (Hain Life science GmbH, Nehren, Germany). For , , and , the programme was denaturation at 94Å°C for 45 seconds, annealing at 52Å°C for 1 minute, and elongation at 72Å°C for a minute. For the same programme was used except that the annealing temperature was adjusted to 45Å°C for 60 seconds.

BioMed Research International - Hindawi Publishing Corporation

An international, peer-reviewed, Open Access journal that focuses on the optimal treatment of infection (bacterial, fungal and viral) and the development and institution of preventative strategies to minimize the development and spread of resistance.

Infection and Drug Resistance - Dove Press Open Access

INTRODUCTION. Extended-spectrum beta-lactamases (ESBL) are enzymes that confer resistance to most beta-lactam antibiotics, including penicillins, cephalosporins, and the monobactam aztreonam.

UpToDate

Diabetes is the leading cause of major complications, such as end-stage renal disease and lower extremity amputations, and is a significant contributor to ischemic heart disease, stroke, peripheral vascular disease, and vision loss (). There has been increasing acceptance of the importance of individualizing glycemic management and assessment of risk for adverse events, especially hypoglycemia ().

Synopsis of the VA/DoD Guideline on Management of Type 2

Final report from the Committee on Antimicrobial Susceptibility Testing, Japanese Society of Chemotherapy, on the agar dilution method (2007) Journal of Infection and Chemotherapy Vol. 14(5), 2008 p.383-392

Non-tuberculous mycobacteria (NTM) are ubiquitous environmental organisms that can cause chronic pulmonary infection, particularly in individuals with pre-existing inflammatory lung disease such as cystic fibrosis (CF). Pulmonary disease caused by NTM has emerged as a major threat to the health of individuals with CF but remains difficult to diagnose and problematic to treat.

US Cystic Fibrosis Foundation and European Cystic Fibrosis

Skin and skin-structure infections are common in ambulatory settings. However, the efficacy of various antibiotic regimens in the era of community-acquired methicillin-resistant *Staphylococcus* ...
