Calculus (from Latin calculus, literally 'small pebble', used for counting and calculations, as on an abacus) is the mathematical study of continuous change, in the same way that geometry is the study of shape and algebra is the study of generalizations of arithmetic operations.. It has two major branches, differential calculus (concerning instantaneous rates of change and slopes of curves ...

Vector Analysis, 2nd Edition: Murray Spiegel, Seymour

Mathematics is one of the oldest disciplines of study. For all its antiquity, however, it is a modern, rapidly growing field. Only 70 years ago, mathematics might have been said to consist of algebra, analysis, number theory and geometry.

Welcome to my math notes site. Contained in this site are the notes (free and downloadable) that I use to teach Algebra, Calculus (I, II and III) as well as Differential Equations at Lamar University. The notes contain the usual topics that are taught in those courses as well as a few extra topics that I decided to include just because I wanted to.

AP Calculus BC is roughly equivalent to both first and second semester college calculus courses and extends the content learned in AB to different types of equations and introduces the topic of sequences and series.

Great book for those who want to see a brief explanation or review of all the math involved in vector calculus. I bought the book to gain insight into the vector calculus integral theorems (Green's, Stoke's & Gauss'/Divergence).

I have a love/hate relationship with calculus: it demonstrates the beauty of math and the agony of math education. Calculus relates topics in an elegant, brain-bending manner. My closest analogy is Darwin's Theory of Evolution: once understood, you start seeing Nature in terms of survival. You ...

Are Exam Schools Effective? The selection criteria employed by these schools all but guarantee students who are likely to do well academically, which raises the question of whether the schools' generally impressive outcomes are caused by what happens inside them—their standards, curricula, teachers, homework—or are largely a function of what the kids bring with them.
